ALEXANDRE CALIARO

FULLSTACK DEVELOPER

PROFIL

I honed my skills at Axiocode, rocking Angular for 2 years, before diving into the e-commerce realm with my own venture. 🛒

Intrigued by the Blockchain magic, I embarked on a journey at Alyra, shaping up as a Blockchain developer. 🌐

SKILLS

- Next.js / React
- Angular
- Typescript
- Solidity
- Symfony
- SQL Server
- Github / GitLab
- French (Native language)
- English (Professional)

PROFESSIONAL EXPERIENCE

Temporary Missions • 2020-2023
Various assignments, from agri-food to archaeology, including automotive and construction.

Self-Employed • 2019
Creation, launch, and maintenance of a Shopify website, along with advertising management through Facebook Ads.

Axiocode • 2016-2019
Development of an application for the FEI (International Equestrian Federation), serving as Lead Dev on the frontend (Angular-Typescript) and providing support for the backend (Symfony API), while also maintaining the SQL Server database.

FORMATION

Alyra School • 2023
Creation, independently or collaboratively, of decentralized applications (DApp) using React, Next.js, and Typescript. Drafting of smart contracts in Solidity, including their unit tests.

NumericALL WF3 School • 2016
Certificate in Web Developer and Integrator 2.0, with expertise in HTML5, CSS3, JavaScript, MySQL, PHP (procedural and object-oriented), and WordPress CMS.

Louis Bertrand High School • 2013-2014
Scientific Baccalaureate with a focus on Computer Science and Digital Science (ISN), including the creation of a Python project for a car racing game.
